

Partner for Student Success

United Way
of Central Minnesota

21st Century Community Learning Center (21CCLC) partners engage in data-driven, continuous program improvement through:

QUALITY PRACTICES Common tools provide common language and peer-sharing opportunities for high-quality programs, emphasizing positive identity development and skill-building.

ATTENDANCE & PARTICIPATION A coordinated approach to attendance and participation across after-school sites for valuable insight into accessibility and use of equity-enhancing practices.

PARTICIPANT OUTCOMES When young people spend significant time in high-quality programs where they have positive experiences, they are more likely to have positive outcomes.

PROGRAM EXPERIENCES Youth are at the center of our work. Their thoughts about enhancing after-school experiences leads to actionable ideas and opportunities.

Through a partnership with multiple school districts, after-school centers and program providers, the 21CCLC team provides:

Committed Leadership

We bring multiple stakeholders to the table: government, business, school district, higher education, nonprofit and community leaders

Coordination

Nationwide research shows that successfully planning, implementing and sustaining a citywide effort does require a separate, coordinating entity like 21CCLC.

Multi-Year Planning

Our work cannot be contained in a single document. 21CCLC programming includes fiscal resources, lays out stakeholder engagement and goal-setting within clear, multi-year planning.

Reliable Information

Utilizing reliable, up-to-date, citywide after-school data creates measureable impact and provides equitable service to our community.

SCHOOL DISTRICTS

- Sauk Rapids-Rice Public Schools - ISD47
 - Pleasantview Elementary School
 - Sauk Rapids-Rice Middle School
- St. Cloud Area School District - ISD742
